

For centuries it has been widely recognized: Quality tools in the hands of an expert craftsman create some amazing results.

One such alliance has just occurred. GuiXT, an outstanding performance enhancement tool, has been placed in the hands of the An Island experts.

GuiXT provides process simplification and automation from within the SAP platform of products. An Island provides the expertise of installation, configuration and modification to maximize the benefits of the GuiXT products. The result of this alliance will be to provide the end customer with an easier, smoother, more efficient business operation, while providing a lower Total Cost of Ownership. When asked about this alliance, An Island CEO, Balaji Kaveripak, remarked “the combination will provide our customers the best of both companies: GuiXT the outstanding software product, and our expert configurations. The combination will deliver a winning solution for customers who desire to maximize efficiencies within the SAP platform and truly delivers cost savings to the bottom line.”

About An Island LLC.

An Island LLC was formed by experts with over 100 years of combined IT and IS experience and the desire to reduce Total Cost of Ownership (TCO) to the customers. The company specializes in SAP implementation and Remote support, Process Automation, WEB Applications and Hosting. Experts within the company have handled various business scenarios in SAP and other business systems across the world. This knowledge will be the key strength in providing value added solutions with GuiXT products.
