An Island announces the relocation of their Tell City office

Tell City, Indiana-April 21, 2008 / An Island, a global provider of software solutions for IT management, is pleased to announce the relocation of its Tell City office to 309 12th Street.

An Island provides business software solutions to a vast array of diverse companies. The company specializes in SAP and Oracle, two dominate Enterprise Resource Planning systems, and provides cost effective software implementations, upgrades, and re-configurations. These systems can be installed on most existing customer servers or hosted remotely by An Island. Through these services customers receive the added benefits of process automation, cost containment, and efficient resource allocation, which deliver an enhanced competitive position in the marketplace.

An Island also offers a broad range of products which meet the growing needs of successful business enterprises. Products such as Remote365, an issue resolution process, provide answers to customer software problems through access to An Island's staff and extensive knowledge base. ADIEU, another product of An Island, is an instructional service, which is customized to each specific customer's training needs. It can be delivered either on site or off site, through interactive elearning courses or WebEx based training.

An Island LLC was formed by Balaji Kaveripak and Randall Cole to meet the needs of the rapidly developing business community, reverse the current business practice of overseas outsourcing, and bring excellent employment to rural America. Balaji Kaveripak and Randall Cole will head the organization as CEO and CFO respectively.

Balaji Kaveripak has years of experience in providing enterprise business solutions for industries world wide. Before forming An Island he worked for Price Waterhouse Coopers, a global consulting company, and most recently managed the IS department for Century Aluminum. He was instrumental in bringing Century Aluminum to an SAP common informational systems platform throughout their entire organization.
